

Strategic Plan 2021–2023

Health Translation Queensland provides a platform for greater integration and collaboration between clinicians, educators, researchers, academics, policy makers and health consumers. As an NHMRC accredited Advanced Health Research and Translation Centre our work is intended to mobilise research into clinical practice, and to support health system and business transformation.

Our vision

- + Improved population health outcomes through collaborative partnerships that translate scientific discovery and knowledge into practice

Our mission

- + To enable the translation and integration of innovative health research with education, policy, clinical care and consumer engagement

Our values

- + Clinical and academic excellence
- + Collaboration and integration
- + Innovation and implementation
- + Inclusiveness and openness
- + Respect, integrity, trust and accountability

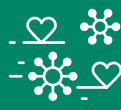

Make the business of translation easier

- + Streamline project governance and establish system performance measures
- + Build and maintain a directory of people, capabilities and activities
- + Leverage and enhance Queensland's digital ecosystem

Strengthen and position Queensland's translational research

- + Support clinician-researcher capability and capacity
- + Enhance clinical trials capability in Queensland
- + Take a state-wide focus linking research, consumers, and acute and primary care

Foster targeted impacts on health and wellbeing

- + Activate consumers and community in translational research
- + Prioritise Aboriginal and Torres Strait Islander people and older people
- + Focus on infectious diseases, genomics and models of care

Reinforce our high performing partnership

- + Provide the access point into Queensland's translation network
- + Foster collaboration between Queensland's researchers, healthcare providers, policy makers and consumers
- + Connect people and communicate with impact
- + Enhance Queensland's funding appeal
